OUR CIRCULATION.

We mean to keep the following paragraph standing for the benefit of all whom it may concern: ADVERTING. - We would commend the following facts to the attention of the advertising community. The "Wilmington Journal" circulates upwards of 12 HUNDRED COPIES Weekly. Its circulation in the town of Wilmington is as large as that of any other paper published in the place. We would further state that its circulation in the counties which trade to this place is THREE TIMES as large as that of any other paper published in North Carolina, and that its list is daily increasing. We say, therefore, without the fear of contradiction, that it is the best vehicle for advertising which the penple of Wilmington can select. One other observation We think, that although a large majority of the readers of the "Journal" are Democrats, still THEY occusionally do a little trading, as well as the readers of the whig pa pers. We have written the above merely for the information of those who are most deeply interested business men of all professions and all political preeds-WHO WANT CUSTOMERS.

TRUE BEAUTY! BY MRS. H. C. GARDINER.

Her eyes were gray, dull, sombre gray; Her cheeks the lilly'd hue; No rosy lips, enclosing pearls, No raven hair with glossy curls, Could she display to view; Her fairy form was never known To figure in a dance;

As heroine she never shown In noval or romance: Yet she was lovely, gentle, good, And pleasant to behold; The charm of intellect was there The purest gem of lustre rare,

And richer far than gold, Were stored in her capacious mind, And in her heart of hearts enshrined. These gems were knowledge, kindness, truth. And heaven-born pirty. They grew And flourished in the days of youth, And now their star-like radiance threw, Around their words, and actions too. Oh! what is beauty? Is it not

That beaming of the soul. That lights the eye with glowing thought, And animates the whole ! The rose may fade, the lilly droop, The auburn locks turn gray. The sylph-like form be heat by age

Or premature decay;
But beauty sever groweth old—

Mormonism — A Good Story.—William Smith, the surviving brother of Jo, has published a manifesto, in which he condemns Strang-another Mormon leader, as an impostor (!) and announces his separation from him In reference to the jar between these champions of religion and truth, the Ottawa Free Trader tells the following story:—
"It appears that the prophet Strang needed

a new house, and he determined that his followers should build it for him. So he called them together, and told them that in consideration that they would erect the house, the Lord had authorized him to promise them an extraordinary endowment. The building was soon completed, and now they apply for their reward. All the Saints are gathered together in the church, the prophet takes them through a variety of ceremonies, such as head washing, feet washing, &c., and concludes by annointing the heads of all with a composition that had a queer smell.' They are then directed to adjourn to another room that was totally dark, where they were to receive the endowment, which was to be in the shape of an extraordinary and visible manifestation of the spirit, rendering them at once impregnable thenceforth to the shafts of Satan. Arrived in the dark room, sure enough, the heads of all shone as if lit up by the brightness of the sun, and great was the rejoicing of the Saints thereat. But the prophet William, who was present, although staggered a little, mistrusted that 'ail was not gold that glittered,' so he took some ointment and submitted it to an examination, and lo the discovery! He found "Ah! Well, you are fortunate. Nobody that it was a mixture of oil and phosphorus, and hence the whole illuminating operation was a gross cheat! He took the first opportunity to accuse prophet Strang publicly, and before the congregation, of the imposition, who so far from denying it, coolly acknowlelged the corn, and then preached a sermon, justifying the act and maintaining that all the miracles of Christ, Moses, &c., were wrought in the same way—that is, by natural means. Of course, William could no longer hold fellowship with such a man.

By a reference to the foregoing statement, i will be seen (compared with the expenditures of former years) that the item of Steam Boat repairs is very large. It was found necessary to have the Boats Gov. Dudley, C. Vanderbilt, and Wilmington, thoroughly repaired, and their guards cut off, for the purpose of rendering them safer and more manageable in bad weather at sea. The Gladiator has undergone repairs during the last year, and the most therefore that remains to be done to her, to render her equal to the other boats, is to have her guards trimmed in a similar manner, and probably a renewal of her copper may become necessary. We may therefore reasonably expect that the expenditures in this department

for the next three or four years will not be so great. In the department of Road Repairs, much imovernent has been made in the Road way, by deepening and widening side ditches, levelling up the Road bed, and in the renewal of Trestle and Lattice Bridges. We cannot, however, promise to ourselves any material reduction of expenses in this department, as it is becoming necessary to renew the present Iron by substituting a heavier and more substantial Rail. And white on this subject, it may be as well to state that, by a comparison with other Rail Roads in our country, we 850, the local business of the Road for the less

This has been the unfortunate mistake in the construction of many of our Southern Roads, and is the chief cause why they have been unprofitable to Stockholders, while in almost every instance in our country where the Iron Rail has been used, the Roads have proved profitable to the Stockholders When we look at the business done on our Road, and the great annual increase of freights and local travel, we cannot doubt that if we could command the means to renew the whole Road with the Iron Rail that the local bu- son of facts; but we might go farther without fear siness alone would support it, independent of the of being considered visionary, because this Road transportation of the Mail and the long or through

If our State will only extend to us the fostering aid which States North and South of us have done for similar works within their limits, we would be enabled to renew the Road promptly, and forthwith insure a profitable return to individuals and to the people at large the peefulness of such works. It may be objected that the State has already sided this Road. She has to a limited extent. but not sufficiently so as to render her aid permanently useful to us. It is only necessary to give permanency to the work to render the stock valuable with even the present business of the Road, if not with our own people, it would be so looked upon by capitalists in other States. We could point to similar works in our country, owing nearly ten times the amount of debts for which this Company is liable, paying dividends, and their stock above par value; and the great reason his Worship the Mayor: doubtless is, that they have substantial roads, on | To the Editor of the Liverpool Times: which the expenses of repairs and transportation are not one-half in proportion to the business done, that it necessarily is upon our road.

The amount of indebtedness of a Company of individual is not a criterion by which to judge of the wealth of the individual, or of the value of the stock of a Company. The business done, and the property upon which the debt is made, is the proper standard by which to judge of their value. A Rail Road Company may owe the entire co-t of their Road, say five millions of dollars, and yet their stock may be a good and safe investment of capital, provided the income, after paying expen-So that it is not the amount of debt but the business done, that determines the value of Rail Road stock. We would therefore recommend to the Compa ny that an earnest appeal be made to our next Legislature, asking aid to enable us to purchase new and substantial iron to relay the road. If they will do this we feel fully assured that all interested will feel and realize the great benefits which should legitimately result from our enterprise. We repeat it, that with the present business of the Road it will be valuable stock, and es pecially if the Wilmington and Manchester Road s constructed-and this brings us to that subject. Since your extra meeting in March last, much ttention has been given to this important work; much labor has been bestowed in col ecting and comparing statistics of the country through which it is proposed to be constructed, all of which tends to confirm this board in the belief that the stock in said Road must yield an annual income of over has visited the North during the summer, where the statistics made out were submitted to the ex- to be adopted, the great point now is to arrest amination of gentlemen of practical experience upon such calculations, and they concurred in the as this. pinion that our estimates of profits, based upon the population and products of the counties and districts through, and adjacent to which, the line Union has the following official annunciaruns, were below, rather than above, the truth -They fur her remarked that the stock in such a work, promising such results, would readily be ta-

The British Government having seen fit charge with full postage across the Atlantic the mail matter which was actually conveyed across it by the United States mail steamer Washington, it became necessary, as a measure of self-protection, that this government should take the steps therein authorized, for terminating the subsisting arrangement be tween the two countries, in relation as well to subject. It is now apparent, we presume, to every sensible man in the country, that the coming Presidential election will be one of deeper interest, and in all human probability fraught with more important consequences, than any cent on two millions, which will cover the cost of which has preceded it for many years. In saying so, we would be distinctly understood to mean what we say. We do not pen this article in any electioneering view, but we do so in a calm, reflecting, mood. From every thing which we now can see, we think that there is no doubt but that the foreign policy of agreeing to said Resolution, but no action was of the country will enter largely into that contest. We see nothing that indicates the termination of the present war anterior to the Presidential election next fall. We, for one do not believe that it will be brought to a close by that time. It is in this view, then, that we Machinery-all of which is respectfully submitted say that the coming campaign will be one of immense importance to the people of this Union. Why? Because we fear that into that contest will be dragged, as an inseparable concomitant of the foreign policy of our Government, a sectional question, which, in times gone past, came well nigh shattering the glorious fabric of our Union. We think it is now pretty clear to every man who can see an inch beyond his nose, that the policy to be pursued with regard to such territory as we may acquire from Mexico, will form at returned unsuccessful: but this, from various least a prominent, if not a lurning point, in the next general election. Those who may aspire to the Presidency, will, we feel certain, be compelled to declare distinctly and unequivocally their views upon the slavery question and well, indeed, and glorious, will it be for that party which can unite upon a man whose views upon this question are based upon the that our usually orderly town will, in time, gather it at harvest time, as for the State to stop enormous weight of a state hierarchy, her in- rights—the constitutional rights—of the States come to rival the worst portions of the city of that can harmoniously pitch their choice upon such a candidate, will, we think, its antagonist pursuing an antipodal course, do much the last week, and as yet the depredators have to ensure its triumphant success. In a word, we think that it is now clear that the doctrine of the WILMOT Proviso will be the great issue of the next election. And if we mistake not, it will require all the patriotism, judgment, and prudence of our citizens so to treat this ominous question that it will not bring upon our country results, at the mere thought of which every patriot trembles. We believe with the democratic party rests the putting down the fell spirit of abolitionism which of late has been casting its baneful influence broadcast over certain portions of our country. Yes, the democratic party can and MUST put down this baleful spirit! How?-And this brings us to the subject which we article. We must hold a National Convention. where all sections will be fully and fairly represented. To that Convention we must send our very best men-our men of prudence and patriotism. the reply of Gen. Cushing, dated Vera Cruz. Oct. 18th, '47, to the committee of the Massa. chusetts Democratic convention, accepting the nomination of that body for the office of Gov. ernor. Its true we read the news of Gen. Cush. ing's defeat at the polls, in the same hour that we read his letter of acceptance, still we peruse the former with interest. In that letter Gen C. gives in his adhesion to the whole of the Democratic principles, in the broadest sense of the term; particularly does he sustain the administration in its views of the war.

THE FREMONT TRIAL -The trial of Col. CLAY STOCK RISING AND TAYLOR DITTO FAL-LING -Every thing which we see indicates upon the motives, causes and objects of war, that a large portion of the Whig party are in favor of Henry Clay as their candidate for the Presidency in the next campaign. At the recent Whig Convention in Connecticut, nine cheers were given for "Henry Clay, the first and only choice of the Whigs of Connecticut," and the delegates appointed to represent them in the National Convention were selected because they are Clay men. Not a word was said about Gen. Taylor. Indeed, from what we can gather from passing events in the political world, we think that the Taylor men are getting particularly scarce just about this time. Would it not be amusing to see those who, not three months ago, were vociferous for the Hero of Monterey, turning tail and going it strong for Clay or some other prominent Whig. Well may the gallant Taylor exciaim, ' Save me from my friends."

n this State, shews that she is all over Democratic. The popular majority for the Democratic candidate for Governor, is about twelve thousand! The whole delegation to Congress is Democratic. The State Senate is unanimously Democratic, and the lower House of Assembly is Democratic by about 10 to 1. Pretty much of a Democratic State.

Massachuserrs.—As usual, this State has elected a Federal Governor, and a Federal Legislature, not, however, by such a large majority as heretofore. Cushing has gained upon the vote for Davis some five or six thousand; and Briggs, whose majority over all last year was nearly eight thousand, is now hardly elected by the people; shewing that the Democrats of Massachusetts are fast catching up with their opponents.

PROSPECTUS OF The Carolina Gazette. THE subscriber intends to publish a weekly newspaper in the town of Wilmington, N. C., with the above title. The first number will

make its appearance on or before the first of Jan-

The GAZETTE is now an applicant for an adequate support, and to secure it, we will labor to make the paper worthy by excluding every article inculcating false or vicious principles, and admitting such only as will inform or elevate the understanding. News of importance will have an early insertion, and the hest information of our MARKETS will be given. It will advocate Democratic principles as they are demonstrated by a pure system of political ethics. We intend that the paper shall present a neat mechanical eppearance, as well as exhibit matter distinguished for its excellence. In a word, the GAZETTE will

be devoted to the best interests of society. We believe that such a paper as the GAZETTE s designed to be will meet with liberal encourage ment from all classes. We claim the privilege of pursuing the busness to which we were brought up, in that pertion of the Old North State which gave us birth, and we hope that the Parmer, Merchant and Mechanic, will bid the GAZETTE onward, by increasing its circulation and usefulness with their names and money.

We deem it altogether unnecessary to enter into any long-winded essay in a Prospectus, but with these few remarks we submit it to the public for their approval or rejection. TERMS .- The GAZETTE will be published weekly, on a Super-Royal sheet, with new type and on good paper, at the LOW PRICE of \$2 90 per annum, payable on receipt of the first number.

Persons wishing to subscribe to the GApaid, at Wilmington, N. C. All who receive this Prospectus will please endeavor to procure subscribers for us, and return the

names of all who may subscribe on or before the WM. J. YOPP. 20th day of December. Editors of newspapers throughout the State will confer a favor by giving the above a few insertions.

States Navy, has kindly sent us the following certificate. It tells its own story:

Rahway, January 25, 1847.

A year since I was taken with the influ nzo and my whole system left in a debilitated state. I was induced to try Dr. Townsend's sarsaparilla, and after tak ng two or three bottles I was very much relieved, and attributed it entirely to the said sarsaparilla. I have continued taking it, and find that I improve every day. I believe it saved my life, and would not be without it under any consideration.

The I baron — John Jackson, Fsq., Entiror of the Rahway Republican, published the above certificate, and remarked in an editorial as follows:

The success of Dr Townsend's preparation of Sarsaparilla appears to be of the most extraordinary character. We publish to-day two certificates in its behalf, one from Capt. McLean, of thi town, and one from Rev. Mr. White, of Staten Island, a gentlemsn well known in Rahway.—Capt. McLean believes the med cine to have saved his life, and Mr. White seems to emertain an equally strong confidence in its efficacy Intelligent men like these would no praise no storigly what they did not fully believe to descret.

RHEUMATISM & THE PILES.

September 10, 1846.

Dr. Townsend—Dear Fir: My wile has been for several years afflicted with rheumatism. Fhe has tried unany different remedies to obtain some relief, but all to no purpose. She was finally induced, by seeing your advertisement, to give your Sarsaparilla a trial. We procured some of it from your agent (Mr. Van Buskirk) and it gives me pleasure to state that after using it she experienced great relief, and was in a very short time perfectly cured. I was also (together with a man in my employ) badly troubled with piles, and by using a small quantity of your Sarsaparilla, our complaint was completely cured. I consider it one of the best of medicines, and would advise all who are afflicted to give it a trial.
